**A**

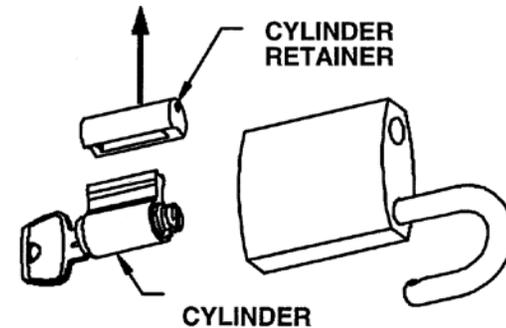

Rotate key to release shackle.

**B**

Insert a 5/64" Allen wrench and remove retainer screw as shown. Cylinder and retainer will drop out together.

**C**

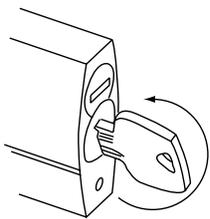

Remove cylinder retainer from cylinder for repining. Reverse steps to reassemble.

**Note: Be sure shackle is in the same position and also the key in the position in the cylinder during reassembly as it was disassembled in order to keep padlock "timed".**

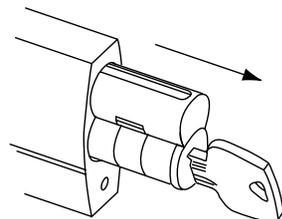

## HOW TO REMOVE LARGE FORMAT CYLINDER FROM 63-758 PADLOCK

**A**

Insert control key and turn counterclockwise until stop is reached.

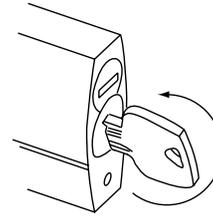

**B**

To remove key - return to vertical position and withdraw.

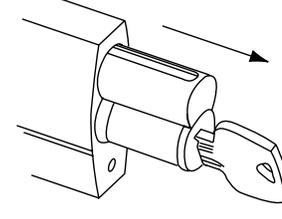

With key in this position, pull out core.

**C**

Insert control key and turn counterclockwise until stop is reached.

**D**

To remove key - return to vertical position and withdraw.

With key in this position, pull out core.

## HOW TO REMOVE OLD STYLE CORE CYLINDER FROM 51- PADLOCK
